

DTM Medical Presents Efficient Specimen Identification Solutions

Article provided by DTM Medical

DTM Medical, German distributor of printing solutions and services with more than 20 years of experience, is presenting its product portfolio for the medical market at MEDLAB 2019. It is showcasing the Signature Cassette and Slide Printers of Primera Technology, among other products, at its stand Z6.G31.

The Signature Cassette Printer, designed for use in pathology and histology labs, prints high-resolution text,

graphics and bar codes directly onto tissue cassettes. This eliminates handwriting making specimen identification safe and accurate as prints don't rub off and are crystal clear.

There are two models available for the Signature Cassette Printer. The SCP-M is the manual version, loading one cassette at a time by the operator. The SCP-R is fully robotic instead, operating a robotic arm, which picks a cassette and puts it in the printer.

The Signature Slide Printer increases the efficiency and accuracy of any lab by printing directly on the slides. It is the world's only colour slide printer, producing on-demand, full-colour or black printing text, graphics, linear and 2D barcodes.

Slides are chemical and UV resistant to withstand processes, commonly used in laboratories, making them reliably identifiable even after several years.

Hangzhou AllTest Biotech Co., Ltd. has a solid foundation with top-notch industry professionals, having proven expertise in innovation management including new introductions, be it a product or be it industry transforming process developments. The manufacturing facility comprises of built-up area of approx. 30000 m² with an annual capacity of approx. 500 million tests. We have obtained Chinese FDA certificate, ISO 13485 certificate, CMDCAS ISO 13485 certificate, CE certificate, and USA FDA 510K.

-  Strong R & D Capability, launch new Rapid Tests every month.
-  Consistent quality and Competitive Price.
-  Certificates —ISO 13485, US FDA, Korean GMP, CE, CFDA,WHO.
